PROJECT MANAGEMENT  
PROJECT PROFESSIONALS

Providing project professionals  
for the Australian mining  
and construction industry.

“Our ‘owners’ team style  
management service has  
positioned Proof Projects  
to provide a cost-effective  
project solution for any  
capital project.”

“At Proof Projects, our team of project professionals deliver project solutions for the mining and construction industry across Australia. We achieve this through our commitment to delivering successful projects by building relationships with clients to understand their needs. Our aim is to consistently deliver a high standard of human resource and provide the most innovative and cost-effective project solutions for our clients.

As the Director of Proof Projects, I bring 15+ years experience in leading mining and civil construction projects to the team. We engage only experienced project professionals that meet our core values, so that our commitment to safety and quality is maintained on every project.

Our reputation has been built on trust and delivering tangible results. Delivering a range of large scale infrastructure projects to date, our company continues to grow, servicing clients in the mining and construction sectors across Australia.

We invite you to learn more about our service and how we may be able to assist you with an ‘owners’ team style of management of capital projects.”

*John Scanlan*

John Scanlan  
Managing Director

## Our Business

Proof Projects was established in 2016 to meet the changing demands of the Australian mining and construction industry. The company has grown into a reputable project solutions provider.

We have built a reputation on quality and safety performance; the dedication and commitment of our team go above and beyond the scope of their role to deliver exceptional outcomes for our clients. Our multidisciplinary practice is renowned for providing high quality, reliable and cost effective, project management services focusing on developing sustainable solutions for any capital projects.

## Our Relationships

Our relationships and ongoing engagement with our clients, employees, subcontractors and suppliers is what gives us the competitive edge.

We strive to maintain long lasting relationships built on responsiveness, trust and integrity. This approach allows us to deliver the best outcomes possible for our clients and our people.

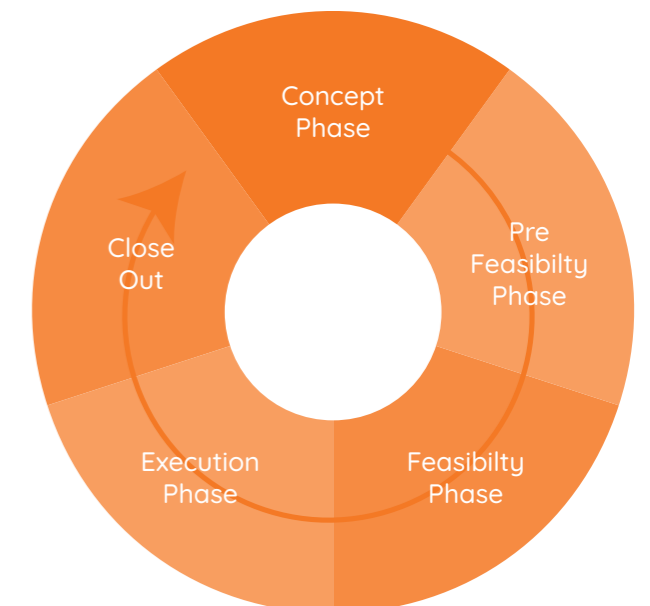

## Proof Projects Difference

Our 'owners' team style management provide a cost-effective project solution for any capital project. Under this style of management our teams will merge with your team to create a cohesive workforce under your banner.

Proof Projects guarantees full support from concept phase through to close out. We customise a team of project professionals to give you the best outcomes for your projects needs at any stage of the project life cycle. We believe it is an investment for both parties to have a successful project delivery.

## Our Process

- Enquiry
- On-site or off-site consultation
- Proposal including an outline of fees
- Contract agreement
- Complete inductions
- Deploy customised team to site
- Performance reviews

## Our Project Services

Our people are project professionals with industry leading experience. The skill set of our team gives Proof Projects the capacity to provide a diverse range of services. This is a direct outcome of the attitude, competence and character of the people that we select to be a part of our team.

The very nature of project work creates peaks and troughs in resource requirements and sustaining this sporadic demand of talented professionals can be a costly exercise for business. Proof Projects offers solutions to this very problem by maintaining small versatile and highly experienced senior management teams who can mobilise to any site at short notice to provide 'owners team' style management of capital projects.

## Project Management

Proof Projects has experienced, project management professionals available to ensure projects are delivered in full, on time and in budget. We offer our clients a full projects management service to take clients projects from concept through to close out. This allows Proof Projects to provide a 'owners' team style management.

Our project teams have the experience to manage projects at any stage of the life cycle with backgrounds in civil, structural, mechanical and electrical fields. Our specialisations include:

### Project Managers

Project Engineers

Construction Superintendents

Construction Supervisors

Project Planners,  
Procurement &  
Cost Engineers

HSE Specialists

Technical Writers/  
Document Controllers

Operational Readiness Specialists

Asset Management

Administration Supports

"Working with Proof Projects has and still is a fantastic place to work. Proof Projects are very safety focused and are committed to see all employees succeed."

- Jamie Robertson, Project Civil Supervisor.

Our Projects

## Tailings Storage Facility Expansion 4

**Location** Cannington, Queensland

**Client** South32

**Duration** 2020 - 2021

**Services** Project Manager, Project Supervisors, Construction Superintendent and Project Administration

**Scope** The objective of the TSFE4 project was to provide tailings storage capacity for 30 months production with a 3.5m raise of Cell 3 to RL 271.1. The execution phase scope consists of mechanical works on tailings delivery and decant recovery systems, civil earthworks to construct the raise utilising in-situ tailings for working platform and local clay borrow materials for the raise; and installation of an internal tailings drainage system to improve tailings consolidation for future raises.

## Cell 1 Buttress Project

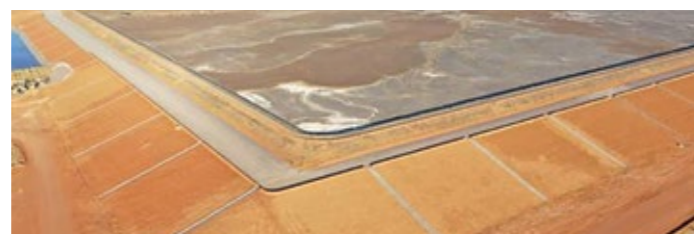

**Location** Cannington, Queensland

**Client** South32

**Duration** 2019 - 2020

**Services** Project Manager and Project Supervisor, Construction Superintendent and Project Administration

**Scope** The project involved the installation of a stabilising buttress on the northern, eastern and southern sides of the tailings storage facility including into the Decant Dam (water dam) to ensure adequate factors of safety for embankment stability under liquefied conditions. The works also consisted of an array of sand filters to intercept seepage flows and suppress surface seepage expressions. Design and construction of the Cell 1 buttress was expedited to ensure Cell 1 embankment would be compliant with ANCOLD freeboard requirements prior to the 2019/2020 wet season.

## Crusher Exclusion Zone Access (CEZA) Project

**Location** Cannington, Queensland

**Client** South32

**Duration** 2016 - 2017

**Services** Construction Superintendent, Project Control Specialist, Document Control, Technical Writer, HSEC Advisor, Project Planner

**Scope** Construction of a replacement underground mining primary crushing in an active underground mining environment. Work involved all civil, mechanical piping, and electrical instrumentation works to provide a fully functioning primary crushing system. The business-critical project was executed under continuous shift or roster cycles, successfully delivered on time and on budget without incident.

## Flinders River Environmental Mitigation

**Location** Hughenden, Queensland

**Client** Neilly Group Engineering (Queensland Government Land Council)

**Duration** 2020

**Services** Project Site Supervisor

**Scope** Project site supervision of wet weather remediation works of a 1000m section of river frontage. Supervision of the installation of a 3:1 batter along the 100m of riverbed as well as excavating and filling of wash away gullies further back from the new position of the river bank. The project also included installation of 500 wooden piles into the 1000m section of mitigated river bank to stabilise and direct the flow of water, to allow sediment deposits in future flood events, rock batters and rock chutes placed in batter to deter future erosion events and hydroseeding of the batter and top sections of riverbank to promote stability and erosion control.

"John and the Proof Projects team have delivered another great quality project for Cannington with the recent completion of TSFE4. This was completed ahead of schedule and to a very high standard. The team are a joy to work with and always willing to assist with operational issues when on site, which makes my life a lot easier!"

- Sammy, Processing Superintendent, South32 Cannington.

"Thanks, John, another example of a well-managed and executed project by you and your team. I know there has been a number of challenges faced as we moved through the phases on this and then into the commencement of TSFE4, but the professionalism and dedication showed by all involved is something to be proud of and is setting our operation up for success."

- Nigel, Engineering and Maintenance Manager, South32 Cannington.

## Working With Us

Engaging project professionals from Proof Projects is a very straight forward process. Our Business Manager, Toni Scanlan will speak with you to learn more about your project objectives and time frame.

Toni will work with you to provide a team of projects professionals to complement your in-house capability. Our 'owners' team' style management of projects have become an in-demand service within the Australian mining and construction industry. We would like to work with you to complete your next capital project works on time and in budget.

To speak to Toni, please call Proof Projects office on 0487 326 704 or email: [tscanlan@proofprojects.com.au](mailto:tscanlan@proofprojects.com.au)

Toni Scanlan  
Business Manager  
Experience 12+ years
